- a. Blindness
 - b. Confusion
 - c. Weakness
 - d. Aging
111. A skilled nursing facility is also known as a _____.
- a. Hospice house
 - b. Drug Rehabilitation center
 - c. Hospital
 - d. Nursing home
112. Your resident is on I&O and at lunch drinks 4 ounces of juice, half of their 8 ounce cup of tea and 8 ounces of broth; You record her fluid intake as
- a. 240 cc
 - b. 20 ounces
 - c. 480 cc
 - d. 600 cc
113. Normally, stool should be:
- a. Black and hard
 - b. Brown and loose
 - c. Red and formed
 - d. Brown and soft
114. All of the following are mucous membranes EXCEPT:
- a. Inside of the cheeks
 - b. Toenails
 - c. Inside the eyelids
 - d. The lining of the bladder
115. The carotid pulse can be found _____
- a. In the leg just behind the knee

- b. On the top of the foot
- c. In the neck
- d. In the upper arm

-  116. Which type of mask would you wear when caring for a resident with TB?
- a. Face mask
 - b. HEPA mask
 - c. You don't need to wear a mask
 - d. Sterile mask
-  117. False imprisonment _____
- a. Involves taking something that does not belong to you
 - b. Happens only in long term care settings
 - c. Occurs when a resident is restrained and cannot move about freely
 - d. None of the above
-  118. The most common site to take the pulse is the:
- a. Brachial pulse
 - b. Carotid pulse
 - c. Pedal pulse
 - d. Radial pulse
-  119. Which way is an example of a correct way to write a blood pressure reading?
- a. 120+75
 - b. 120/75
 - c. 120-75
 - d. 120"75
-  120. When documenting in the residents chart you must not
- a. Use red ink
 - b. Cross out incorrect information
 - c. Use white-out
 - d. All of the above
-  121. You overhear another Nursing Assistant say, "hurry up you stupid old woman!" to one of the residents. What should you do?
- a. Confront the Nursing Assistant who used abusive language
 - b. Wait until the other Nursing Assistant is gone, then ask the resident what happened
 - c. Tell your husband about the situation and ask him what you should do
 - d. Report the incident to your supervisor right away

-  122. Respiration consists of
- Narrowing of blood vessels
 - Circulating blood in the heart
 - Urinary elimination
 - Inspiration and expiration
-  123. Passive range of motion exercises are done:
- By the resident herself
 - By the resident with some help and support from the Nursing Assistant
 - When a resident cannot move on her own
 - By a Doctor or physical therapist only
-  124. The functions of the Integumentary System include _____
- Production of Vitamin D
 - Detection of pain, touch, and temperature regulation
 - Protection of internal organs
 - All of the above
-  125. The main goal of bathing is _____
- 
- To remove oil from the skin
 - To make the resident smell better
 - To promote comfort and remove pathogens
 - To inspect the skin
-  126. Insulin reaction can be caused by:
- A cerebrovascular accident
 - Physical or emotional stress
 - Too much food
 - Too little food
-  127. Which of the following is a good source of protein?
- Corn oil
 - An orange
 - Fish
 - Grape Jelly
-  128. Which of the following is a good way for a Nursing Assistant to care for a mentally ill resident?
- 
- Do everything for the resident
 - Give the resident his or her medication
 - Encourage the resident to stop being mentally ill and just get better
 - Support the resident and his or her family and friends

-  129. Risk factors for urinary tract infections include:
- a. Incontinence, colostomy, excellent hygiene
 - b. Cognitive impairment, immobility, indwelling urinary catheters
 - c. Asepsis, indwelling urinary catheter, improper catheter care
 - d. Proper handwashing technique, confusion, high blood pressure
-  130. Which of the following blood pressures falls within the normal range?
- a. 120/90
 - b. 90/50
 - c. 140/82
 - d. 120/70
-  131. Which of the following statements is true of positioning?
- a. Residents will not need help getting into comfortable positions or changing positions
 - b. Constant pressure on an area helps prevent pressure sores
 - c. Nursing Assistants should check residents' skin each time they are repositioned
 - d. Bedbound residents should be repositioned every three hours
-  132. Your supervisor assigned you to be in charge of training all the new Nursing Assistants for the upcoming week because she is going out of town. What should you do?
- a. Do the best you can do
 - b. Refuse the assignment
 - c. Call the DON
 - d. Talk to coworkers about the situation
-  133. Signs of respiratory distress include:
- a. Excessive sleep
 - b. Fever
 - c. Elevated respiratory rate
 - d. Lack of interest in surroundings
-  134. A facility is required to provide to the resident or resident's representative a notice of _____ when discharged or transferred to another facility?
- a. 10 days
 - b. 21 days
 - c. 30 days
 - d. 7 days

-  135. Safely transferring a resident from the bed to their wheelchair includes all of the following EXCEPT:
-  a. Making sure their siderails are raised
 -  b. Making sure the resident has on proper non skid footwear
 - c. Making sure the brakes on their wheelchair are locked
 - d. Making sure the resident has time to dangle
-  136. What is the first food to be restricted in a low-sodium diet?
-  a. Salt
 - b. Milk
 - c. Red meat
 - d. Food high in fat
-  137. The resident is on I&O; which items would be counted as fluid intake?
-  a. Milk, Jello, toast
 - b. Soup, jello, mashed potatoes
 - c. Broth, jello, icecream
 - d. A and B
-  138. Which of the following options is NOT considered verbal communication?
- a. Crossing their arms and looking down
 - b. Repeating your question
 - c. Asking a you a question for clarification
 - d. Greeting you and stating your name when you enter the room
-  139. A Nursing Assistant's duties regarding tube feedings include:
- a. Observing the feeding and reporting problems
 - b. Inserting tubes
 - c. Doing the feedings
 - d. Cleaning the tubes
-  140. If a resident starts to fall, the best thing a Nursing Assistant can do is to:
-  a. Widen her stance and bring the resident's body close to her
 - b. Catch the resident under the arms to stop the fall
 - c. Lock her knees
 - d. Move out of the way
-  141. An emotional consequence of immobility is _____
- a. Dementia
 - b. Confusion
 - c. Delirium
 - d. Depression

142. Which of the following is true of families?
- a. Only a mother, father and children can be considered a family
 - b. If an Nursing Assistant does not like a resident's family, it's fine to avoid them
 - c. No matter what kind of family a resident has it is important for the Nursing Assistant to recognize the important part they play
 - d. An Nursing Assistant does not have to talk to a resident's family if she disagrees with their opinion
143. The RN asks you to bring a specimen to the lab "stat". You would _____.
- a. Wait till the other Nursing Assistants come back from break and then bring the specimen down
 - b. Take the residents vital signs so you can report them to the lab when you bring the specimen down
 - c. Before the end of your shift bring the specimen to the lab
 - d. Bring the specimen down immediately
144. Which type of urine specimen includes the first and last urine in the sample?
- a. Clean catch
 - b. 24-hour
 - c. Routine
 - d. 36-hour
145. The primary cause of death for individuals who are 85 years or older is _____
- a. Injuries related to falling
 - b. Infections
 - c. Chronic illness
 - d. Dementia
146. What can the overbed table be used for?
- a. Placement of dirty linens
 - b. Placement of bedpans
 - c. Placement of meals
 - d. Placement of urinals
147. If a resident with Alzheimer's disease has problems with dressing, the Nursing Assistant should:
- a. Dress the resident in the hallway
 - b. Choose the resident's clothing for the resident
 - c. Give the resident multiple steps to follow
 - d. Lay out clothes in the order they should be put on

148. If a resident with Alzheimer's disease has lost most of his verbal skills, the Nursing Assistant should:
- Assume the resident cannot understand what is being said
 - Ask the resident questions
 - Use touch, smiles and laughter
 - Do not involve the resident in activities
149. When you feed your blind resident lunch you should _____
- Let them know what you are feeding them
 - Keep quiet so they can enjoy their lunch
 - Feed them quickly so their food is still hot
 - Put on your favorite TV show
150. Which of the following is a typical task that an Nursing Assistant performs?
- Helping residents with toileting needs
 - Changing a sterile dressing on an open wound
 - Administering medication
 - Prescribing treatments
151. Abduction is:
- Moving a body part away from the body
 - Bending a body part backward
 - Another name for the leg
 - Another name for the hip
152. Residents with Alzheimer's disease
- Sleep well at night
 - Often wander aimlessly at night
 - Do best in large groups
 - Like changes in their schedule
153. Which of the following should a Nursing Assistant do during a resident's admission?
- Handle the resident's personal items with care
 - Rush the admissions process
 - Make sure not to bother the resident with introductions to other residents and staff
 - Tell the resident he'll be able to figure out the daily routines on his own
154. When providing denture care for your residents, you should do all of the following except?
- Carry the resident's dentures in your gloved hand to the sink for cleaning
 - You should place them in a denture cup before transporting them

- c. You should always use cool or tepid water for cleaning, rinsing, and storing dentures
- d. You should also line the sink with paper towels to reduce the risk of breaking the dentures if you should drop them.

-  155. Deep breathing exercises help:
- a. Improve appetite
 - b. Promote social interactions
 - c. Clear the lungs of mucus
 - d. Improve joint flexibility
-  156. Physical abuse includes the following Except _____
- a. Hitting
 - b. Biting
 - c. Inappropriate kissing
 - d. Scratching
-  157. Security needs include all of the following Except _____
- a. Shelter
 - b. Safe transfer techniques
 - c. Goals
 - d. Clothing
-  158. A new resident is admitted to a long term care facility whose primary language is French. They should be given a copy of resident's rights in:
- a. English
 - b. French
 - c. Spanish
 - d. German
-  159. "Occult" blood means that the blood is:
- a. Visible
 - b. Cancerous
 - c. Added to a stool sample after it is collected
 - d. Hidden
-  160. When shaving a resident's face, it's important to remember to
- a. Dab shaving cream on
 - b. Dry the face well before shaving
 - c. Shave in the direction of hair growth
 - d. Use alcohol on any nick or cuts

161. The proper way to apply a condom catheter is _____
- Pull the condom catheter all the way to the tip of the penis leaving no space
 - Encircle the penis with tape to hold the catheter on
 - Tape the catheter over the top of the penis
 - Leave a one-inch space between the catheter and the penis
162. You get mad at your supervisor and walk off the floor and go home. This is an example of _____.
- Assault
 - Battery
 - Negligence
 - Abandonment
163. During HS care you notice a reddened area on your resident's coccyx. You reposition them on their left side and 15-20 minutes later the area on her coccyx is still red. What stage is the area?
- Stage I
 - Stage II
 - Stage III
 - Stage IV
164. You are asked to obtain daily weights on your resident, when is the best time?
- Right after lunch
 - The same time each day
 - Night time
 - rotate times
165. What can ruin a stool specimen if it is included?
- Liquid stool
 - Tongue blades
 - Too large a quantity of stool
 - Urine
166. Mrs. Goldman, a resident, begins to tell her Nursing Assistant, Gene, about the last religious service she attended. Gene does not believe in God. Gene's best response is to:
- Listen quietly to Mrs. Goldman
 - Tell Mrs. Goldman that he does not believe in God and would prefer not to discuss it
 - Tell Mrs. Goldman that her beliefs are wrong
 - Ask Mrs. Goldman what makes her think that there is a God

167. During an enema, a resident will be in the
- Sims
 - Lateral
 - Supine
 - Fowler's position
168. Which of the following statements is true of urination?
- Indwelling catheters do not affect muscle tone
 - Alcohol and caffeine decrease urine output
 - Stress and privacy issues can affect urination
 - The bladder holds more urine as people age, causing them to urinate less frequently
169. Which of the following is true of assisting a resident who is having a seizure?
- Give the resident a glass of water to drink
 - Move furniture away to prevent injury to the resident
 - Hold the resident down if he or she is shaking severely
 - Open the resident's mouth to move the tongue to the side
170. You should always notify the nurse if the resident's blood sugar level is _____.
- Greater than 350
 - Between 80 and 150
 - Less than 50
 - A and C
171. When would it be necessary to wear gloves?
- When feeding a resident.
 - When touching non-intact skin.
 - When combing the resident's hair.
 - When dressing the resident.
172. The medical abbreviation for after meals is:
- a.c.
 - p.c.
 - bid
 - Q
173. Role reversal can sometimes occur during this time period _____.
- The young adult years age 20-35
 - Middle Age 35-55 years
 - Early old Age 55-65 years

d. Old Age 65 and up

174. _____ occurs when the top layer of skin is pulled one way and the lower layers are stationary or pulled in the opposite direction.
- Puncture
 - Shearing
 - Friction
 - Sliding
175. The first stage in the cycle of aggressive/combatative behavior is _____.
- Defensive behavior
 - Rage
 - Anxiety
 - Physical aggression
176. Which of the following is a function of the nervous system?
- Senses and interprets information from outside the body
 - Gives the body shape and structure
 - Provides a natural protective covering to the body
 - Produces and supplies antibodies and other infection fighting blood cells
177. The exchange of oxygen takes place in the _____
- Bronchi
 - Pharynx
 - Alveoli
 - Larynx
178. The function of the white blood cells is to:
- Help the body fight infection
 - Carry oxygen to the cells of the body
 - Assist the body to clot the blood
 - All of the above
179. Factors that affect our respiratory rate include _____
- Pain
 - Stress
 - Health
 - All of the above
180. Which of the following thermometers is used to take a temperature from the ear?
- Oral thermometer
 - Rectal thermometer
 - Tympanic thermometer

d. Axillary thermometer

181. Which of the following is something a Nursing Assistant should watch for specifically when using warm and cold applications?
- a. Vomiting
 - b. Increased restlessness
 - c. Fear of addiction to the applications
 - d. Blisters

182. Which of the following is a guideline for good skin care?
- a. Pull residents across sheets during transfers
 - b. Massage white, red or purple areas.
 - c. Check the resident's skin daily and report changes.
 - d. Do not reposition residents in wheelchairs.

183. A resident with Parkinson's disease may struggle with_____.
- a. Self-esteem issues
 - b. Depression and anxiety
 - c. OCD
 - d. A and B

184. Your resident has edema in his legs and is on a fluid restriction in terms of his fluid intake. You have been assigned to weigh him daily. Based on his symptoms and the care he is being given, what disorder is he most likely affected with?
- a. COPD
 - b. Diabetes
 - c. Congestive heart failure
 - d. Parkinson's Disease

185. Which of the following is true of helping a resident dress?
- a. The resident should do as much to dress himself as possible.
 - b. A Nursing Assistant should choose the resident's clothing for the day.
 - c. If a resident has weakness on one side, the Nursing Assistant should start with the stronger side when dressing.
 - d. Residents should dress in night clothes during the day.

186. A resident's physical needs include _
- a. Oxygen, food, water
 - b. Religious beliefs
 - c. Self-actualization
 - d. All of the above

-  187. What does palliative care involve?
- The resident's recovery
 - Pain relief and comfort
 - Teaching the resident to care for himself
 - Curing the resident's illness
-  188. You are interviewing for a Nursing Assistant position. Which of the following is not a good thing to say to your potential employer?
- "I love the idea of making people's lives more comfortable and helping them get better."
 - "I have three younger siblings so I really started taking care of others as a child."

 - "My last supervisor was fantastic and I learned a lot at that job, but I'm really excited to gain new skills as a Nursing Assistant."
-  189. A factor that influences attitudes about death is:
- A person's dietary habits
 - Whether a person has had the measles
 - A person's religious beliefs
 - How often a person reads the newspaper
-   190. When transporting a resident in a moving elevator you should
- Make sure the brakes are on
 - Stand in front of them
 - Hold onto the arms of the wheelchair
 - Always stand behind the wheelchair
-   191. One way a Nursing Assistant can help with normal changes of aging related to the integumentary system is to:
- Withhold fluids so a resident will not go to the bathroom often
 - Keep sheets wrinkle-free
 - Clip toenails frequently
 - Rub lotion into red or irritated spots on the resident's skin
-  192. A Yeast Infection is most commonly found:
- On the scalp
 - In warm, moist areas of the body
 - In dry, dark areas of the body
 - On the hands

193. Which of the following statements is true of IV's?
- Nursing Assistants insert IV lines
 - Nursing Assistants will remove IV lines
 - Nursing Assistants will change IV lines when the bag is empty
 - Nursing Assistants will observe the IV site for problems
194. Which is true for left Sim's position
- Is a comfortable reading position?
 - Is good for drinking liquids
 - Is the best position for the resident to be in when administering an enema
 - Is the easiest position for sleeping
195. Which of the following is an example of objective information?
- "Mrs. Johnson says she has a rash on her torso."
 - "There are raised, red marks the size of pinpricks on Mrs. Johnson's torso."
 - "Mrs. Johnson must have a rash because she looks uncomfortable."
 - "Mrs. Johnson requests lotion."
196. Ways we can help meet our resident's self-worth needs include_____.
- Understanding their likes, patterns and goals
 - Keeping them neat and clean
 - Allowing them to wear their own clothing
 - All of the above
197. Which of the following is a guideline for managing stress?
- Drink whenever it makes you feel more relaxed
 - Skip meals so you can get more done
 - Take regular smoking breaks
 - Get enough sleep
198. Which of the following terms means "a serious loss of mental abilities?"
- Cognition
 - Irreversible
 - Onset
 - Dementia
199. What is the single best way for an Nursing Assistant to manage his or her time efficiently?
- See the Nursing Assistants favorite resident first
 - Let other care team members answer call lights so the Nursing Assistant can finish assignments.

- c. Save time by washing hands only after caring for residents who are obviously sick.
- d. Plan ahead by making a list of tasks to do.

200. HIV can be transmitted:
- a. To an Nursing Assistant who touches an infected resident's telephone
 - b. To anyone who uses the same toilet as an infected person
 - c. To a fetus by an infected mother
 - d. To people who hug an infected person when that person has a fever

201. What should a Nursing Assistant do if she suspects a resident is being abused?
- a. Report it to the Nurse immediately and let them handle it from there.
 - b. Ask family and friends for advice.
 - c. Wait for the resident's regular nurse to return from her vacation and then report it directly to her.
 - d. Do nothing because someone has probably already reported it.

202. What is one good way a Nursing Assistant can assist residents with normal changes of aging related to the urinary system?
- a. Restrict fluids
 - b. Scold residents who are incontinent
 - c. Offer frequent trips to the bathroom
 - d. Make sure every resident wears incontinence briefs

203. The resident complains that he is in pain. What do you do first?
- a. Tell the resident that you can't do anything about it.
 - b. Tell the charge nurse.
 - c. Massage the area with lotion.
 - d. Ask the resident to describe more about the pain.

204. Which of the following is a good way for a Nursing Assistant to respond to inappropriate sexual behavior?
- a. Let other residents know what is happening
 - b. Inform other Nursing Assistants that the resident has a dirty mind
 - c. Loudly reprimand the resident to shame him into stopping
 - d. Take the resident to a private area

205. The normal respiration rate for adults ranges from:
- a. 18 - 30 breaths per minute
 - b. 12 - 20 breaths per minute
 - c. 15 - 25 breaths per minute
 - d. 1 - 10 breaths per minute

206. We can help our residents socially by_____.
- Letting them know which activities are planned
 - Making sure they have their glasses and hearing aids as needed
 - A and B
 - None of the above
207. When using a transfer belt, the Nursing Assistant should:
- Place it under a resident's clothing
 - Place it around a resident's waist
 - Place it around a resident's chest
 - Leave enough room to insert a hand into it
208. According to Erikson some young adults have difficulty with their relationships because they fail to achieve what developmental task? _____
- Intimacy
 - Initiative
 - Integrity
 - Trust
209. The five senses are _____
- Sight, hearing, taste, smell and common sense
 - Hearing, taste, smell, common sense and auditory
 - Hearing, smell, taste, sight and touch
 - Sight, taste, smell, auditory and visual
210. Pressure ulcers are most commonly found on the
- Coccyx
 - Knees
 - Hands
 - Elbows
211. Which of the following options BEST defines hazardous waste?
- Any body fluid containing visible blood
 - Trash taken from the resident's room who are currently on precautions
 - All waste matter that has the potential to cause infection
 - Bloody bandages
212. Parkinson's disease typically causes:
- A shuffling gait
 - Extremely straight posture
 - Memory loss
 - Aggressive behavior

213. Which of the following decreases with age?
- Need to sleep
 - Circulation
 - Vision
 - Muscle mass
214. What is the best way to care for a resident who wanders into another resident's room?
- Take him for a walk.
 - Restrain him.
 - Tell him to go to his own room.
 - Let him go outside.
215. Who developed the Hierarchy of Needs?
- Erikson
 - Piaget
 - Maslow
 - Nightingale
216. Which of the following is another word for "armpit"?
- Rectum
 - Tympanic
 - Temporal
 - Axilla
217. When might suctioning be needed by a resident in subacute care?
- After a heart attack
 - When a wound is healing too slowly
 - When secretions have collected in the upper respiratory system
 - When blood sugar level is too low
218. When communicating with residents who are hearing impaired, which of the following statements is TRUE?
- You should speak short, clear statements
 - Stand directly behind the resident when speaking
 - Speak in a loud, high pitch voice
 - Make sure the TV is turned up when you are trying to communicate with them
219. Which risk factor places residents at the greatest risk for falls?
- Acute illness

- b. Chronic illness
- c. Old Age
- d. Dementia

-  220. A resident requests a meatless meal in observance of a religious Holiday. As her Nursing Assistant you
- a. Scold them for not letting you know sooner and tell them you'll call down when your finished with lunch
 - b. Google the Holiday and suggest alternative ways to celebrate the Holiday
 - c. Tell the resident it's too late now but you'll check with the kitchen and have a meatless tray sent tomorrow
 - d. Immediately arrange for the meatless meal within the resident's diet
-  221. Which of the following is a guideline for medical asepsis?
- a. Take all contaminated items to the clean utility room.
 - b. Pile dirty linens on the floor.
 - c. Wash your hands after sneezing.
 - d. Place the bedpan on the over-bed table.
-  222. A resident is yelling and screaming that they do not want to take a bath. Which right is he demonstrating?
- a. The right to privacy
 - b. The right to refuse
 - c. The right to voice grievances
 - d. The right to informed consent
-  223. For breakfast your resident gets cereal, fruit, eggs and toast. They eat all of their eggs, half of their cereal, all of their fruit and half of their toast. You would record this as
- a. 75 percent
 - b. 50 percent
 - c. 25 percent
 - d. 100 percent
-  224. Which of the following is a type of advance directive?
- a. Incident report
 - b. Doctor's note
 - c. Durable Power of Attorney for Health Care
 - d. Menu of Healthcare Choices
-  225. Which of the following is true about sterile dressings?
- a. They can be applied and changed by Nursing Assistants

- b. They cover wounds that are dry and closed
- c. They are never used in long-term care
- d. They cover open or draining wounds

-  226. The heart has:
- a. 2 Chambers
 - b. 3 Chambers
 - c. 4 Chambers
 - d. None of the above
-  227. An increase in confusion and agitation at the end of the day is called_____.
- a. Dementia
 - b. Sundowner's Syndrome
 - c. Alzheimer's disease
 - d. Delirium.
-  228. What should be done with soiled bed linens?
- 
- a. They should be shaken out to be sure none of the residents' personal belongings are put in the wash
 - b. They should be rolled up with the clean side in
 - c. They should be left in a pile outside the resident's door for housekeeping to pick up
 - d. They should be rolled up with the dirty side in
-  229. A resident who is diagnosed with Impetigo should be on strict _____
- 
- a. Contact precautions
 - b. Airborne precautions
 - c. Droplet precautions
 - d. None of the above
-  230. The first sign of skin breakdown is:
- a. Pale, white, reddened or purple skin
 - b. Muscle damage
 - c. Shallow crater
 - d. Pressure sores
-  231. When helping a resident using a walker you should remind them to
- 
- 
- a. Take several steps then slide the walker forward
 - b. Move the walker and their feet at the same time
 - c. Move the walker forward and slide their feet forward
 - d. Move the walker forward and once it is down firmly step up to the walker

232. A resident has refused her physical therapy appointment today. As her Nursing Assistant you know that
- All residents have the right to refuse treatment
 - You must force her to go to physical therapy
 - HIPPA gives residents the right to free physical therapy
 - A and C
233. How frequently should a resident without a pressure ulcer be repositioned?
- Every hour
 - Every 2 hours
 - Every 3 hours
 - Every 4 hours
234. The chain of infection the pathogen leaves the host and travels by what method?
- airplane
 - Mode of transmission
 - swims
 - the pathogen dies once it leaves the host
235. Which of the following should you NOT do when lifting a heavy object from the floor?
- Lift using the muscles in the thighs and upper arms
 - Keep the object close to your body as you lift
 - Keep your feet close together
 - Bend your knees
236. Homeostasis is:
- Abnormal changes in the body systems
 - The building block of the body
 - A group of cells that perform a similar task
 - The condition in which all of the body systems are working at their best
237. There are _____ types of muscle tissue.
- 2
 - 3
 - 4
 - 5
238. Which of the following is a major cause of admission to longterm care facilities?
- Arthritis
 - Dementia and other mental disorders
 - The common cold

d. Influenza

239. Nursing Assistants can legally_____.
- a. Supervise other Nursing Assistants
 - b. Assist residents with their ADLs
 - c. Mentor other Nursing Assistants
 - d. Teach other Nursing Assistants
240. Many people, particularly older people, go to what kind of healthcare facility after they are discharged from a hospital after a stroke?
- a. A hospice
 - b. A subacute care center
 - c. A respite center
 - d. A group home
241. Which of the following is a task to perform for both preoperative and postoperative care of a resident?
- a. Assisting the resident to change into a gown
 - b. Applying anti-embolic hose
 - c. Measuring and recording vital signs
 - d. Removing dentures, glasses, contact lenses, and any other personal items
